

TRASP 2013: Tools and Resources for the Analysis of Speech Prosody

30 August 2013 – Aix-en-Provence - France

Calls for papers – Extended Deadline

Tools and Resources for the Analysis of Speech Prosody is an [Interspeech 2013](#) satellite event. This workshop will be the occasion to bring together people involved in developing **tools and resources** (corpora, annotations, annotation scheme, ...) for the analysis of speech prosody in order to evaluate the state of the art in this area, summarising what tools and resources are currently available and what other of tools and resources are in greatest need of development. It will also be an opportunity to discuss ways in which work in this area might benefit from harmonisation and collaboration.

In order to increase comparability for the different tools, contributors will be asked to apply their tools to a common corpus which, when possible, will be made available by the organisers. Since it is expected that tools may concern several different languages, a multi-lingual corpus (the continuous passages from the EuroMI corpus) will be used.

Workshop Topics:

We invite you to submit papers in any area related to *tools and resources for the analysis of*:

- Phonology and phonetics of prosody
- Prosody in perception and production
- Prosody in speech synthesis
- Prosody in speech recognition and understanding
- Prosody in computational linguistics
- Prosody in audiovisual processing
- Prosodic corpus
- Prosody of dialogues and spontaneous speech
- Cross-linguistic studies of prosody

Paper Submission Procedure:

Paper submissions must conform to the format which will be defined in the paper preparation guidelines and provided with the author's kit, on the TRASP 2013 website, along with the Final Call for Papers. Papers must be submitted via the on-line paper submission system. The working language of the conference is English.

Regular papers should be 6-8 pages in length which would preferably consist of survey papers, and including a 150-200 word abstract. Short papers should be 2-4 pages in length, and including a 150-200 word abstract. Accepted papers will be considered either for an oral presentation, or for a poster presentation, with or without an accompanying demonstration. At least one author of each accepted submission must register for and attend the workshop.

Important Deadlines:

- Abstract submission deadline: ~~April 29, 2013~~, **May 6, 2013**
- **Full paper submission deadline: May 13, 2013**
- Notification of acceptance: May 31, 2013
- Camera-Ready paper due: June 10, 2013
